

# AMIE® Essentials for Wi-Fi

Device Provisioning and Spectralink Application Management

**AMIE**

ADVANCED MOBILE  
INTELLIGENCE  
FOR ENTERPRISES

A web-based device management dashboard designed for IT and Telecommunications Administrators to simplify device configuration and oversee Spectralink Versity Smartphones.

Deploying a new fleet of Wi-Fi devices can take weeks of valuable time. Configuring device settings, and application settings, and assigning extensions individually is a tedious and repetitive task. What if you could manage deployments and more from one centralized tool? AMIE (Advanced Mobile Intelligence for Enterprises) Essentials is the solution.

## Benefits

- Designed to support the management of thousands of devices and batteries from one screen
- Optimizes device provisioning
- Simplifies the set-up of new and replacement devices with one click copy configuration
- Easily configure Spectralink apps like BizPhone, Push-To-Talk, Buttons, and SAFE

### AMIE Main Dashboard

See a full operational view of devices across the enterprise from one screen

### Spectralink Application Management

Centrally configure and manage Spectralink application settings at an enterprise, group, or device level

### Batch Configuration

Configure call server registration including call server IP address, extension, and user-name and password

### Device Deployment

Reduce the complexity of device provisioning and seamlessly on-board devices with just a few clicks

### Copy Configuration

Copy settings from an out-of-service device onto the new device reducing the down time

### Battery Management

Monitor the health of individual batteries and receive proactive alerts when a battery needs to be replaced

AMIE  
Essentials

AMIE Essentials is available through an annual subscription per device.

## How AMIE Essentials Support IT Administrators with Device Management

### 1. Reduce the complexity of device deployment with Spectralink Application Management

**Spectralink Application Management** provides an intuitive way to configure and manage the deployment of Versity smartphones. Easily configure Spectralink applications, like BizPhone, SAFE, Barcode, Push-To-Talk, Buttons, and more, at an enterprise, group, or device level. With this tool, devices can be set-up and in the hands of workers within minutes.

**Batch Configuration** allows administrators to configure call server registration, including call server IP address, extension, and username and password. EMMs require settings to be entered individually for each device, but batch configuration increases efficiency and allows settings to be configured in batches at the enterprise, group, or user level from one screen.

**Streamlined Extension Sync** batch uploads individual BizPhone extensions for thousands of devices in seconds. Without AMIE Essentials, entering SIP client extensions individually into an EMM can take days of work.

**Copy Configuration** enables administrators to quickly set up replacement devices. With a few clicks, the configuration from an out-of-service device can be copied onto the replacement device. This puts the new device into circulation within minutes, reducing the downtime.

### 2. Monitor battery health and avoid disruption from depleted batteries

**The Battery Management dashboard** provides visibility into the health of individual batteries and allows administrators to proactively alert end-users when a battery has reached the end of life. This prevents batteries that can no longer hold a charge from being placed back into the charger and circulated among other mobile workers.

### Need more visibility into device and network performance?

Upgrade to AMIE Advanced for premium features like call performance analytics, proactive alerts, and device location tracking.

For a demo of AMIE Essentials, contact your local sales representative or Spectralink Partner.

### About Spectralink

As an award winner in mobile technology, Spectralink has been transforming the way our customers work and communicate for 30+ years. Through our determination to do extraordinary things, we enable mobile workforces and empower our customers and partners to explore what's next, what's possible. With our enterprise grade, best-in-class mobile solutions, we are with our customers wherever they work, however they need us. Our people, commitment to innovation and our passion are our foundation for success.
